

Options Homework for MFIN 820

Refik Türkelî

22/2/2019

For my homework, I'm selecting Tesla, Inc. as my last name starts with T. As of this writing, Tesla's stock price is \$292.74. I have downloaded options prices from [Yahoo Finance](#) on 21/02/2019 15:08:00 EST. Option pricing data can be seen at the end of this pdf. The code written for generating this document can be seen [on Github](#).

Q1. Confirm that higher exercise prices mean lower call prices and higher put prices.

To confirm this, option prices have been filtered. Only options that have been traded in the last 3 hours and have a volume more than 20 are selected. Options used for this analysis have a maturity of 30 days. Raw data for this plot can be observed at the end of this report.

Effect of Strike Price on Call and Put Premiums

Q2. Confirm that longer maturity means higher prices for both calls and puts.

To observe the effect of maturity, options with 15 days and 30 days to expiry are compared. As it can be seen from the plot, in all cases the slope is positive for both puts and calls.

Type	Strike	15 days	30 days
call	290.0	12.60	17.45
call	295.0	9.87	14.55
call	297.5	9.38	14.00
call	300.0	7.75	12.20
call	320.0	2.39	5.80
call	332.5	1.17	3.55
call	350.0	0.44	1.33
put	200.0	0.25	0.67
put	240.0	0.82	2.52
put	250.0	1.30	3.41
put	260.0	2.20	5.00
put	272.5	4.20	7.93
put	275.0	5.00	8.55
put	280.0	6.55	9.90
put	287.5	8.46	12.00
put	290.0	10.26	14.21
put	295.0	12.70	16.55
put	300.0	15.65	19.10

Q3. Choose a put and call with the same exercise price and maturity. Confirm that the put-call parity holds

Risk free 1 month treasury yield curve rate observed at the time of this report is 2.43%. Stock price for Tesla, Inc. is \$292.74. Put-call parity holds nearly perfectly.

Strike	C	P	PV(X)	C + PV(X)	P + S	Difference
250	46.07	3.41	249.49	295.56	296.15	0.59
280	23.20	9.90	279.43	302.63	302.64	0.01
290	17.45	14.21	289.41	306.86	306.95	0.09
295	14.55	16.55	294.40	308.95	309.29	0.34
300	12.20	19.10	299.39	311.59	311.84	0.25
320	5.80	27.21	319.35	325.15	319.95	-5.20

Appendix: Data

Type	Maturity	Strike Price	Last Price
call	15	287.5	15.00
call	15	290.0	12.60
call	15	295.0	9.87
call	15	297.5	9.38
call	15	300.0	7.75
